

FIG. 1: Usable hydrogen gravimetric and volumetric storage capacities of 1000 MOFs (Metal-Organic Frameworks) at 25 MPa and 298.15 K vs density.

FIG. 2: Usable hydrogen gravimetric and volumetric storage capacities of 1000 MOFs (Metal-Organic Frameworks) at 25 MPa and 298.15 K vs porosity.

FIG. 3: Usable hydrogen gravimetric and volumetric storage capacities of 1000 MOFs (Metal-Organic Frameworks) at 25 MPa and 298.15 K vs largest pore radius.

FIG. 4: Usable hydrogen gravimetric and volumetric storage capacities of 1000 MOFs (Metal-Organic Frameworks) at 25 MPa and 298.15 K vs SSA (Specific Surface Area).

FIG. 5: Usable hydrogen gravimetric and volumetric storage capacities of 1000 MOFs (Metal-Organic Frameworks) at 25 MPa and 298.15 K vs specific pore volume.
